

**MINUTES OF THE 40<sup>th</sup> MEETING OF NATIONAL COUNCIL FOR VOCATIONAL  
TRAINING, HELD ON 16<sup>th</sup> DECEMBER, 2011 AT LECTURE HALL, NASC COMPLEX,  
PUSA, D.P.S ROAD, NEW DELHI**

**ITEM NO. 4003.2: Granting affiliation from NCVT to Government and Private ITI(s) for limited period of time**

Member Secretary informed the council that as per existing system, affiliation was granted on permanent basis. As a result, the institutes once affiliated would remain affiliated for their lifetime. Permanent affiliation was one of the reasons for deteriorating quality in ITIs. There had been observations of shifting the machinery equipment etc. from one place to another.

Accordingly, it was proposed that affiliation would be granted for a limited period of time. Issue was deliberated in the subcommittee meeting held on 17<sup>th</sup> March 2011 and it was unanimously agreed that any affiliation should be valid only for 5 years.

After every 5 years, the institute should be inspected afresh and should be granted fresh affiliation. If any institute is being inspected at any point of time, when institute has few trades and units affiliated for more than 5 years, all the trade/units of the institute shall be inspected and affiliated afresh even if few units were affiliated for less than 5 years. No affiliation will be permanent. All the existing permanent affiliations would be valid only for 5 years, from the date of grant of affiliation.

**The council approved the proposal to grant affiliation to Government and Private ITI(s), from NCVT for a period of five years.**

**ITEM NO.4003.9: Setting up of a computer lab as an infrastructure resource at all the Industrial Training Institutes affiliated to NCVT**

Member Secretary informed the council that IT Literacy course had been made compulsory for all the trades under Craftsmen Training Scheme (CTS) for compliance with the 38<sup>th</sup> meeting of NCVT (3804.12).

Internet is an important resource for learning various subjects. Many study materials for theory and practical are made available by different agencies in the Vocational Training and Skill Development on the web. Shortage of instructors is affecting the Vocational Training not only in terms of quantity but quality also, and the existing instructors are so engaged that they do not get time to visit industries, attend quality improvement programmes conducted by DGE&T Institutes, to upgrade their knowledge and skill in the subject according to prevailing industry scenario. The internet resource would give an opportunity to students and instructors to get connected with the international learning resources.

Hence, computer lab would also be very useful in training and learning of various modules covered under employability skills and other projects.

The setup of the computer lab must have minimum ten computers/workstations and peripherals with internet facility irrespective of trade(s) or trade related computer requirement for an ITI affiliated with NCVT up to seating capacity of 100. For each additional unit affiliated, two computers/workstations must be added.

**The council approved that every Government and Private Institute affiliated to NCVT must set up an exclusive computer lab with internet connectivity on every workstation with computer and multimedia set up.**
